

- * HALIK is a manufacturer of Key Products (KP).
- * A Key Product is a concentrate of a final HALIK product.
- * These concentrates are shipped to our worldwide distributors in order to be mixed with local materials to achieve the finished products: TL-2000, Crack Repair, Pothole Repair, RAP Roads, Color Coating and more.
- * We usually partner with asphalt manufacturers.
- * The added value we bring to these partners comes in the form of year-round workability and reduced cost through recycling.

* Business Model

HALIK exports KP
in 20" containers
(90 drums X
200 liters)

Our partner
mixes the KP
with local
materials

A cheap, local,
end product is
achieved

- TL-2000
- Crack Sealer
- Pothole repair
- Road construction
