4. FIRST-AID MEASURES

4.1 Description of first aid measures

After inhalation:	Remove patient from exposure, keep warm and at rest. If symptoms persist, obtain medical attention.
After skin contact:	Remove contaminated clothing immediately and drench affected skin with plenty of water, then wash with soap and water. Contaminated clothing should be thoroughly cleaned. If symptoms persist, obtain medical attention.
After eye contact:	If substance has got into the eyes, immediately wash out with plenty of water for at least 15 minutes. If symptoms persist, obtain medical attention.
After ingestion:	Do not induce vomiting. Provided the patient is conscious, Wash out mouth with water and give 200-300 ml of water to drink. If symptoms persist, obtain medical attention.

4.2. Most important symptoms and effects, both acute and delayed

May cause eye irritation.

4.3 Indication of any immediate medical attention and special treatment needed

In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).

5. FIRE-FIGHTING MEASURES

5.1 Extinguishing media:

Suitable Extinguishing Media: Foam, CO₂ or dry powder.
For large fire use: Water spray.

Unsuitable Extinguishing Media: Do not use water jet.

5.2 Special hazards: May give off toxic fumes in a fire. Carbon monoxide,

Carbon dioxide and various hydrocarbons.

5.3 Advice for firefighters:

A self-contained breathing apparatus and suitable

Protective clothing should be worn in fire conditions.

Keep fire exposed containers cool by spraying with water.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Avoid contact with skin and eyes. Wear suitable protective clothing and gloves. (See Section: 8). Contaminated clothing should be thoroughly cleaned.

6.2 Environmental precautions: Avoid dispersal of spilt material and runoff and contact

with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

6.3 Methods and materials for containment and cleaning up:

Small spill: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill: Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows.

Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product.

6.4 Reference to other sections:

See Section 8 for information on appropriate personal protective equipment.

See Section 13 for additional waste treatment information.
